(54) DISPLAY UNIT

(57)Abstract:

PURPOSE: To enable to display in the form of flexibility for broader graphic area as a whole, by displaying arbitrary graphic area on each CRT of the display unit consisting of a plurality of CRT's in common use of the control section.

CONSTITUTION: The device controller 11 performs control for the CRT's 17-1... 17-4, memorizes the video information with the picture memory 13, and stores the address of the memory 13 to the picture memory address circuit 12. The video information from the memory 13 is branched with the distributor 14, the video information distributed is stored in a plurality of refresh memories 16-1...16-4, and the address of the memories is stored in the refresh memory address circuit 15.

Further, CRT's 17-1...17-4 are provided in pair with the memories 16-1...16-4 to display the video information stored in each memory. Thus, arbitrary graphic area is displayed on each CRT, and the graphic area broader as a whole can be displayed with flexibility.
